

WHY USE PROTEIN MAX?

Protein Max provides N and S that are critical to maximizing protein levels in grain. In addition, Protein Max contains AgraCity's proprietary blend of plant growth regulators to help the crop overcome stress and maximize growth.

N-17% | S-10%

AgraCity Proprietary environmental stress package

AgraCity Proprietary plant growth promoters

APPLICATION RATES

Recommended Rate 1.0 L/Acre

RECOMMENDED CROPS AND STAGE

PROTEIN MAX has been specifically designed to be applied on cereals at fungicide timing.

Cereals:flag and leaf heading stage

BENEFITS

- Increased plant vigor & growth
- Increased nutrient uptake
- Supply of micronutrients
- Improved plant resistance to stress
- Potential increase in yield and grain protein

TANK MIX RECOMMENDATIONS

PROTEIN MAX should be added to the spray tank following the addition of all fungicides but prior to the addition of surfactants.

DO NOT use mixed with alkaline copper fungicides or inoculants. If mixing with other chemical, always preform a jar test to check product compatibility.
