

AMMO[®] EXTRA HERBICIDE

AGRACITY EXCLUSIVE PRODUCT Tribenuron-methyl + Dicamba Herbicide

WHY USE AMMO EXTRA?

- Agracity Exclusive Product - contains a higher rate of dicamba, specifically designed for control of Group 2 resistant kochia
- Enhanced control of dandelion, narrow-leaved hawk's-beard and kochia
- Controls or suppresses 25 broadleaf and grass weeds when mixed with glyphosate (all types)
- Use in all soil zones
- Multiple systemic modes of action for resistance management
- Tank mix with any glyphosate
- No re-cropping restrictions the year after application
- Great value and price for reduced tillage weed control

FOR USE ON

Reduced tillage fallow. Spring wheat, durum wheat, barley may be seeded after application.

WEEDS

CONTROLLED*

When mixed with glyphosate acid equivalent at 0.5 L/acre (360 gm a.i./L)

Weeds up to 8 cm

- Canada fleabane
- Common ragweed
- Narrow-leaved hawk's beard

Weeds up to 3 leaf

- Cow cockle
- Wild buckwheat

Rosette

- Canada thistle³

Weeds up to 15 cm

- Dandelion
- Downy brome
- Flixweed
- Giant foxtail
- Green foxtail
- Hemp-nettle
- Kochia¹
- Lady's thumb
- Lamb's-quarters
- Persian darnel
- Redroot pigweed
- Russian thistle
- Stinkweed
- Volunteer barley
- Volunteer canola²
- Volunteer flax
- Volunteer wheat
- Wild mustard
- Wild oats

* Requires the addition of 372 ml/acre 2,4-D Ester 600

¹ Including Group 2 resistant biotypes

² Including all HT varieties

³ Suppression

AMMO EXTRA HERBICIDE

AGRICITY EXCLUSIVE PRODUCT

REQUIRED SURFACTANT

- None required when used with glyphosate

ACTIVE INGREDIENTS

- Tribenuron-methyl 75% dry flowable (DF)
- Dicamba 480 g/L solution

PACKAGE SIZE

- **Case:** 160 acres

WHEN TO APPLY

- When seedling weeds have emerged and are actively growing

WATER VOLUME

- 5-10 US gallons/acre (20–40 L/acre)

RAINFAST PERIOD

- 1 hour

RE-CROPPING OPTIONS

- Grow all major crops the year after application

TANK MIX OPTIONS*

- **Disruptor® 540 glyphosate†**, **Destroyer® 540 glyphosate†**

STORAGE

- Product can be frozen

GRAZING AND HARVEST

- Graze or feed livestock 7 days after application
- No pre-harvest interval for registered crops

MIXING INSTRUCTIONS

1. Fill the spray tank 1/2 full of clean water, begin agitation and continue throughout mixing and application process.
2. Add the required rate of **MPower® Extra** and agitate until product is fully dissolved.
3. Add the required amount of **Ammo**.
4. Add the required amount of **Disruptor or Destroyer glyphosate**.
5. Add any other required products or surfactants, complete filling the remainder of the tank with water and apply.
6. Product must be applied within 24 hours in order to remain effective.
7. If application is stopped prior to completion, re-suspend spray solution by full agitation prior to commencing spraying again.

UNDERSTANDING PERFORMANCE

- Use 50 mesh or larger screens in spraying equipment.
- **Ammo Extra** must be mixed with glyphosate.
- Optimum control will occur during warm moist conditions when weeds are actively growing. Degree and duration of control will depend on weed sensitivity, weed size, spray coverage and growing conditions.
- For best results, ensure thorough spray coverage of target weeds, use higher water volumes for heavier weed pressure.
- Weeds hardened off by cold weather or drought stress may not be adequately controlled or suppressed and regrowth may occur.
- Application to fields impacted by severe weather conditions, drought, frost, low fertility, water-logged soil (soil at or near field capacity), disease or insect damage may result in reduced or delayed performance or injury on succeeding crops.
- Do not use on highly variable soils that have large gravelly or sandy areas, eroded knolls, calcium deposits, or soils with less than 3% organic matter.
- Product effectiveness will be reduced if left in the sprayer for more than 24 hours after mixing.

Always read and follow all label precautions and directions.

*When applying tank mix combinations, always follow all label requirements for each product used in the tank mix. In cases where these requirements differ between the tank mix partner labels, the most restrictive label must be followed.
